A FASTER AND SIMPLER
Bottle Packaging Solution
with Superior Shipping Protection

Designed to fit the vast majority of 750ml bottles

Introducing the award-winning bottle-packing solution that ensures your bottles will always have weight-bearing protection regardless of the orientation of the carton during shipping.

Packs faster and makes quality control more manageable

The UP Standing orientation allows bottles to be packed considerably faster with less labor. It also allows for quicker quality checks without having to remove cumbersome layers.

Passes ISTA 3A (UPS), ISTA 6A (FedEx) and ISTA 6-Amazon

The UP Standing pack has been certified by an independent ISTA packaging laboratory after testing numerous randomly packed cases with various size bottles. In conclusion, they stated “this testing, in comparison to all the other glass shippers we have tested in the past, was the most successful.”

Creates a quality presentation to your consumer while offering superior protection

The 4-Component shipper offers protection superior to other comparable bottle shippers with less breakage and fewer returns.

- The horizontal corrugated partition ensures side-to-side compression strength
- Top & bottom molded end caps constructed to universally fit the vast majority of 750ml bottles
- End caps protect the neck of the bottle and allow for easy packaging
- All components are 100% recyclable
- Currently available in 6-pack, 9-pack, 12-pack and 15-pack shippers.
